LOGTECH Master of Science (iMS) Program

2 Dec 2010

LOGTECH iMS

Whitman
School of Management
SYRACUSE UNIVERSITY

The LOGTECH iMS is a Master of Science in Supply Chain Management delivered by the Martin J. Whitman School of Management at Syracuse University. The program is designed to sustain the growing need in various branches of government for individuals who understand and can develop, manage and lead the complex integration of goods, services and distribution, in a variety of critical and tactical situations. The Master of Science in Supply Chain Management at WSM provides a clear competitive advantage in the ability to strategically align critical supply chain support services with vital tactical objectives to sustain the Department of Defense goals and objectives.
